Description

JAMMBCO Patented LinkHanger Assembly (2 part) comes with our unique base and cap that replaces a traditional hanger and shackle assembly.

{tab=Advantages}

- Free rotation of the chain prevents chain hang-ups
- The cap can be replaced and/or re-used
- Easy removal during a turnaround
- Heavy duty design increases life
- Easily installed with our exclusive locking system
- Material for base can be matched to the shell to avoid any welding issues
- Used with any refractory thickness
- Can be used on a bare kiln shell
- Provided in numerous alloys depending on service temperature
- Minimal heat loss through the shell
- JAMMBCO on-site installation supervision is available
